Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Continued Examination Under 37 CFR 1.114

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's AF submission filed on 8/25/06 has been entered.

Claim Rejections - 35 USC § 103

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 8,9,13,14 are rejected under 35 U.S.C. 103(a) as being unpatentable over Ochoa et al. (6139584) in view of Ralph et al. (6916483). Ochoa et al. show (Fig. 2) positioning means **100** with an uneven shape or outer circumference that faces the bone canal when inserted therein and having means for mounting **108** (a fitting hole) that is offset from the distal tip center axis since the structure of the positioning means has a non-symmetrical shape. Please note the intended use, as set forth in the claims, carries no weight in the absence of any distinguishing structure. It can be seen that the positioning means has a diameter in horizontal cross-section larger than the cross-section of the stem component. However, Ochoa et al. fail to disclose the material for the positioning means is biodegradable. Ralph et al. show (Figs. 1F, 1G) an implantable device with mounting means, such as a fitting hole for attachment to a prosthesis.

Ralph et al. teach the device is bioabsorbable, see abstract and col. 4, lines 15,16,24-30 and col. 6, lines 52,55-57,65,66. Ralph additionally teaches the use of a biodegradable attachment means provides the ability to deliver therapeutic material to the orthopedic surgical site, col. 4, lines 1-16. It would have been obvious to one of ordinary skill in the art to use a biodegradable material as taught by Ralph et al. for the positioning means of Ochoa et al. such that it can deliver a therapeutic material to the implant site and provide treatment to the patient's body for more rapid recovery.

Response to Arguments

Applicant's arguments with respect to claim 8 have been considered but are moot in view of the new ground(s) of rejection.
